Parcel-Processing Automation That Adapts to Your Environment

THE 2017-18 HOT COMPANIES

ENGINEERING™ innovation

Engineering Innovation, Inc. (Eii) is dedicated to providing cutting-edge solutions that offer rapid parcel processing, maximum postage savings, excellent service and support, and the best of class technology and engineering to our customers. Eii has more than 30 years of combined postal and parcel automation design experience to develop solutions that work for any size fulfilment and shipping operation.

Eii's **EZ-WorkDesk** offers elegant simplicity to your parcel processing, providing quick parcel induction capabilities. The **EZ-WorkDesk** integrates data conversion tools to capture information from multiple platforms and warehouse management system environments to generate shipping labels on demand.

In 2017 Eii introduced the **Chameleon Parcel-Processing Solution** that provides custom off-the-shelf options to perfectly fit your needs, including barcode and OCR reading, weighing, dimensioning, RFID, label application, labeling and sorting. The **Chameleon** comes in a variety of speed ranges to meet the end users' needs and budget and the modular design customizes to fit the needs of your operation. The **Chameleon** is ideal for Outbound Processing, Data Capture, Parcel Induct, and Logistics companies.

Also new from Eii, the ***LightSort*** sort-to-light or pick-to-light design is a low cost way to quickly improve accuracy, productivity, and data tracking. Minimal training means operators are up to speed in no time. Quickly sort or fill orders using our hands-free Bluetooth ring scanner. The ***LightSort*** was winner of the USPS Mailing Innovation and Digital Award for the Great Lakes Area presented at the 2017 National Postal Forum.

In line with Eii's commitment to provide the industry with cost effective solutions for maximizing postage savings, these systems open up new savings/revenue opportunities for fulfillment, consolidation, returns package processing, mailers, and shippers. We compliment these great products by providing hardware and software service after the sale, designed to ensure our customer's success.

Eii has been providing innovative and cost effective automated parcel solutions for more than 10 years, growing from a start-up of three guys in 2006 to a diverse and skilled team of more than 60 employees today. We look forward to many years of continued growth as we keep pace with the dynamic letter and parcel industry.
