IMPROVE TURN-AROUND TIMES As e-commerce volumes increase, you may find yourself trying to handle a larger capacity through the same facilities. Additionally, more consumers opt for priority overnight delivery. Both factors put pressure on you to optimize the parcel handling process. Installing Caljan Telescopic Conveyors at your doors will help you speed up loading & unloading. The conveyors are able to handle small and large parcels, moving any load the operator can lift smoothly into the sortation system. Once the vehicle is (un)loaded the conveyor quickly retracts and the operator is ready to (un)load the next vehicle.

REDUCE COST PER PARCEL Boasting a 5-year structural warranty, Caljan Telescopic Conveyors are future-proof & built to last. The universal multi-connector makes it easy to upgrade or modify the unit, to meet your future requirements. Get more out of your investment, by utilizing the same Telescopic Conveyor at multiple doors. Once the vehicle starts to draw away from the dock, the conveyor can slide along rails to the next door and begin loading or unloading.

FROM VAN TO 45' TRAILER The height of a Caljan Telescopic Conveyor can be adjusted, so that the same unit can be used to load/unload multiple vehicle types. The impressive extendibility means the operator can work quickly and smoothly even when inside the last 3 ft of the vehicle.

ATTRACT/RETAIN EMPLOYEES Working inside trucks and trailers doesn't need to be dark and uncomfortable. Numerous optional features allow us to customize each unit to fit your precise requirements: a platform brings the operator to an appropriate working height, a belt extension brings the parcels to the conveyor. It is even possible to heat the work area & circulate air. The incredible front lighting and floor illumination is standard on every conveyor, providing a really bright work environment.

YOUR LOCAL PARTNER Whether you are in the early exploration stage, or in need of service, Caljan Rite-Hite is able to meet your needs. Together we consider possibilities and find the right solution, supporting you at every step, including installation and maintenance.
