What We Do

FirstMile is the one of the fastest growing shipping logistics providers with strategic partnerships that include carriers like DHL, FedEx, USPS, and Canada Post. We specialize in complete front-end solutions for domestic and international shippers in eCommerce and direct-to-consumer industries. Our solutions include front-end technology, multichannel software, multi-carrier services, as well as daily pickups and injections. These solutions provide clients with cost savings, error reduction and customer satisfaction.

Why Customers Care

FirstMile Specifically helps customers:

- ▶ Increase bottom-line revenue through shipping rate reduction
- ▶ Decrease time spent on shipping processes through integrated shipping systems
- ▶ Access personalized systems and tools that allow transparent shipping management
- ▶ Utilize multi-carrier shipping options through FirstMile's strategic partnerships

Who Uses FirstMile

FirstMile clients are small to medium-size eCommerce companies shipping as few as 50 orders or as many as tens of thousands each day. They ship domestically and internationally, wanting to realize "high-volume" pricing incentives that only large corporations can enjoy. They need efficient and effective labeling, tracking, transit, pick-up, and insertion into the mail streams for destination delivery.
