**Improve Safety  
and Compliance**

by automatic collection of information  
required to comply with regulations  
and perform safety inspections

# Honeywell

**LeanLogistics**

Honeywell Sensing and Productivity Solutions is a global leader in enterprise and workflow performance solutions designed to enable companies to achieve higher performance across their value chain. Customers rely on Honeywell's integrated solutions, including cloud-connected mobile worker applications and high-performance data collection hardware, to enrich operational intelligence with data-driven insights that enable them to make better business decisions.

Honeywell's data-driven technologies deliver real-time information exactly where it's needed so companies have complete and timely visibility of their goods at all times. Embedding data-driven decisions, powered by analytics, empowers organizations to accurately track every item throughout the supply chain and improve efficiency, saving immeasurable hours in cross docking, yard management, and pickup and delivery operations:

**Postal / Courier / Express / Parcel**

Develop a high-achieving workforce with Honeywell. Our integrated, mobile workflow solutions equip you to elevate productivity, quality and responsiveness in your core end-to-end operations – all of which leads to a more competitive, more profitable enterprise.

**Fleet Management**

Boost your fleet's efficiency and safety with our agile workflow solutions. Through proactive fleet management, you can increase vehicle lifecycle, performance and efficiency, preventing unplanned downtime and customer dissatisfaction.

**Ports and Intermodal**

Six of the world's 10 largest ports and 300+ ports and intermodal facilities worldwide count on Honeywell. Why? Because we understand the industry's unique requirements. And our workflow solutions enable a more connected, more agile workforce for greater performance
