

Freight Audit is obsolete.
Today there's a smarter way.

Integrated Shipping IntelligenceSM

RateLinx

Integrated Shipping IntelligenceSM

RateLinx shipping and logistics management software brings an approach to freight management like you've never seen before. Our software and services suite creates a strategic platform to let you find freight strategies through data, test the strategies through modeling, execute the strategies with ShipLinx TMS, and measure and monitor the successful results of the strategies with the Dashboard.

The foundation of RateLinx is built on data collection. Only RateLinx connects order data, shipment data and invoice data with our dynamic Intelligent Invoice ManagementSM payment system. With complete visibility to transactions within 24 hours, RateLinx provides actionable Integrated Shipping IntelligenceSM — saving millions of dollars for our customers as they reduce shipping costs, increase efficiency and work smarter with carriers.
