Intelligent Audit

Your Transportation Savings Partner

Intelligent Audit provides shippers with a global, all-mode transportation audit, recovery, freight payment and business intelligence reporting partner. As the trusted transportation savings partner for more than 2,000 shippers worldwide, Intelligent Audit continually improves on its best-in-class technology in order to provide clients with an unparalleled mix of analytics and reporting. IA boasts an experienced staff of transportation and logistics professionals who offer cost savings expertise and incomparable client service. With its combination of dynamic technology and seasoned staff, Intelligent Audit is the true partner and trusted advisor every shipper needs. Some of IA's cost-cutting services include:

Freight Audit, Recovery & Payment

Intelligent Audit takes a 360-degree approach to transportation recovery—meticulously auditing, analyzing and reporting across all modes, locations and systems. Using its proprietary software, IA's small parcel audit is the most thorough solution on the market, catching overcharges due to late shipments, duplicate billing, residential adjustments, address corrections and more. Such a comprehensive audit maximizes the hard-dollar recovery from carriers and helps prevent future overcharges from occurring.

Loss and Damage Claims Management

As one of the only freight audit companies that provides an end-to-end solution for loss and damage claims, Intelligent Audit streamlines this labor-intensive process and reduces your internal costs while improving service to your customers.

Financial Logistics

Intelligent Audit's financial logistics processes are deployed within some of the world's largest shippers, providing them with the detailed cost allocation and forecasting information required in order to truly understand their overall logistics cost down to the item or SKU level.

Analytics and Information Management

Intelligent Audit provides a dependable, real-time reporting solution to help your team make smart business decisions – including carrier choice, mode and service level management, and shipment consolidation.

Supply Chain Consulting and Systems Integration

Whether negotiating a new carrier contract or evaluating locations for a new distribution center, IA clients receive unparalleled consulting from our team of industry veterans. Intelligent Audit can create customized solutions for a wide range of cost-cutting projects, from network and operations analyses to TMS, Accounting and WMS integration.
