

LaserShip is an industry-leading parcel carrier facilitating last mile delivery to Eastern U.S. markets for businesses that desire reduced transit times, greater flexibility, and the elimination of excess costs within their supply chain.

Our expedited delivery solutions help time-critical businesses achieve the right service mix of same day, one day and extended day delivery for optimal customer flexibility and cost-effectiveness.

We are strategically located to reach the high population areas of the east coast, with one day service hubs reaching into the Northeast, Mid-Atlantic, Southeast, and Florida. Without the time burdens of a rigid, "one size fits all" distribution system, LaserShip arranges pick-ups and deliveries based on customer need.

As a collaborative partner for B2C and B2B, LaserShip offers solutions that give you the competitive edge in the marketplace:

- Later pull times
- No accessorial fees
- Shortened transit times
- Flexible delivery network
- Saturday and Sunday delivery
- One day footprint reaching large segments of East Coast population
- Same day service in metro markets
- Full visibility into the last mile of your supply chain for you and your customers
- Central customer service

LaserShip will help consumers get your products more quickly while lowering the cost of distribution for your business.

Our consultants are available to help you design the solutions that best meet your supply chain objectives. Contact us today!
