

# Parcel Select Service

World-class shipping at an  
affordable price

Parcel Select is the U.S. Postal Service's lowest-cost ground shipping option. Parcel Select is a workshare program that leverages the world-class processing and transportation networks of consolidators with the unmatched reach of the Postal Service's delivery network.

Parcel Select features three low-cost pricing options based on entry location. The closer to destination the packages are deposited, the better the price option. Combine that with high service levels and product visibility, and Parcel Select is a full-fulfillment solution that's second to none.

But in today's market, it's not just about cost savings; it is also about your carbon footprint. Protecting the environment isn't an option, it's a necessity for any shipper trying to compete in today's economy. Parcel Select is an eco-friendly shipping option on the market today. Postal Service letter carriers go to every address every day, and your packages tag along for the ride with other customers' regular mail, requiring no additional fuel for delivery. The Postal Service is a recognized industry leader for eco-friendly shipping solutions. Traditional competitors, who are also Parcel Select customers, last year entrusted us with hundreds of millions of packages for the Postal Service to deliver the last mile. By using the Postal Service to handle your shipping, you can tell your customers that your commitment to the environment involves every aspect of your business, right down to delivery.

Have we convinced you to take a look at Parcel Select? Well, don't just take our word for it. Companies like Shaklee, known for their high service standards, use Parcel Select for their last-mile delivery.

"The Postal Service's delivery network, combined with a consolidator's logistics operation, provides a consistent, cost-effective solution in areas other carriers will only service at high premiums or not at all. Thank you for taking the uncertainty out of being able to provide excellent service to all our customers,

even those scattered to the furthest locations imaginable," says Daniel Danahy III, logistics manager at Shaklee US, LLC.

But it's really all about customer service. So let's hear what one customer has to say about Parcel Select:

**"The strategic partnership between USPS Parcel Select and FedEx SmartPost is a win-win solution and is testimony that two customer-focused transportation companies can work together to leverage their strengths to bring customers a superior ground service solution in today's competitive and economically challenging marketplace."**

— Ward Strang, President of FedEx SmartPost

Parcel Select consolidators save you money by combining your shipments with those of other companies to build densities and a deeper sort level. They are then deposited into the Postal Service Network closer to their final destination. The closer the package is dropped to its destination, the more money you can save. Oh, and did we mention that a full list of consolidators is available on our website at [www.usps.com/shipping/consolidators](http://www.usps.com/shipping/consolidators)?

So if you are looking to cut shipping costs while maintaining high levels of service, check with your current provider to see if they offer a shipping solution that includes a Parcel Select shipping option.
