

About us

LaserShip is a regional parcel carrier facilitating last-mile delivery to the Eastern U.S. for businesses desiring shorter transit times to their customers, increased flexibility, and the elimination of excess costs within their supply chain. Founded in 1986, LaserShip has evolved into a leading provider of same-day and next-day delivery services for premier e-commerce and product-supply businesses, and is trusted by fortune 500 companies to deliver packages faster than national carriers while lowering distribution costs.

What makes LaserShip a HOT company in 2015?

We Help Build Brand Loyalty

E-commerce is growing steadily and shows no signs of stopping. This growth makes it increasingly difficult for brands to build loyalty amongst consumers who have endless shopping options. Amongst the top deciding factors consumers use to choose what brands to buy from are shipping costs and estimated delivery dates. LaserShip offers seven-day delivery options with same-day services available in metro markets while offering full visibility into the status of packages for both businesses and consumers, so everyone knows where packages are until it arrives in the hands of your customer.

We're Growing

In 2014, LaserShip acquired Prestige Delivery Systems to form the largest regional parcel carrier that offers a wider range of delivery solutions across multiple industries. Our most recent expansion efforts took place just last month as we introduced five additional markets to our network: Michigan, Kentucky, Ohio, Indiana, and West Pennsylvania. LaserShip has the largest one-day and two-day footprint in the Eastern U.S., offering the fastest delivery options in the market.

We Care

Our care permeates all facets of our company because we love what we do. Long-term employment is the norm at LaserShip, and many of us have been together for ten years or more. We care about getting your customers' shipments to them on time, and our customer service team works seamlessly to troubleshoot any issues to ensure your customer has a positive delivery experience and is left with a positive impression of what both of us are all about.

EXECUTIVE PROFILE

Executive Comment from Josh Dinneen, LaserShip's Senior Vice President:

"LaserShip is in the perfect position to respond to the B2B and B2C e-commerce growth trajectory. We continue to see positive trends across all verticals, and we're staying nimble in order to stay ahead of the curve. We're continuing to invest in infrastructure by improving our facilities, material handling and sortation equipment, and expanding our network. Shipping partners like Plated and Vitacost.com are experiencing rapid growth and relying on us to continue expanding, which has driven us to increase our footprint by more than 54% over the last 18 months.

LaserShip offers the only ground alternative to the two national carriers, and with the fastest delivery options in the market, our e-commerce service offering gives our shippers opportunities to continue to build strong shopper loyalty, which we couldn't be more excited about."
