### Parcel Spend Management

Alexandretta specializes in consistently driving cost savings for clients spending between \$1mm-\$500mm+ on parcel annually. Our expertise in the industry allows us to review every aspect of parcel data and optimize savings via detailed analytics, negotiations support, contract optimization, strategy, audit and business intelligence. Typical savings average 10%-20%, leading to increased profits and competitive leverage for our clients.

### Contract Optimization

Our dedicated team of parcel experts bring over 80 years of carrier pricing and sales expertise to our clients. Regardless of client size or spend, we find savings 95% of the time, therefore providing the biggest area of opportunity for parcel shippers. As parcel carriers continue to raise rates, as well as add new rules and surcharges, this remains an area requiring increasing sophistication and a significant time investment. Alexandretta becomes a trusted extension of our clients' teams, adding bandwidth and resources to optimize savings and time.

### Audit Recovery & Business Intelligence

In addition to providing late shipment and manifest error recovery, we also provide sophisticated solutions that incorporate shipment booking, trend analysis, GL-coding, rate audit, shipment visibility, rate shopping, transit analysis and business intelligence tools through our cloud-based systems.

### Global Solutions

While we are headquartered here in the U.S.A and have a powerhouse team of domestic parcel experts on staff, we also bring a passionate team of global experts that optimize parcel savings in Canada, Europe, the Middle East and Asia.

Additionally, our audit solutions extend to all modes of transportation globally, providing a seamless set of data management, analytics and recovery solutions to our clients.

### Global Savings

As the world grows ever smaller and more competitive, Alexandretta brings a unique mix of integrity, expertise, commitment, resources, skillsets and strategy to maximize your savings in the global economy.
