

ALEXANDRETTA

TRANSPORTATION CONSULTING

Parcel Spend Management

Alexandretta is the global leader in parcel spend management and consistently drives cost savings for clients spending between \$1mm-\$500mm+ on parcel annually. Our expertise in the industry allows us to review every aspect of parcel data and optimize savings via detailed analytics, negotiations support, contract optimization, strategy, audit, and business intelligence. Typical savings average 10%-20%, leading to increased profits and competitive leverage for our clients.

Contract Optimization

Our dedicated team of parcel experts brings over 80 years of carrier pricing and sales expertise to our clients. Regardless of client size or spend, we find savings 95% of the time, therefore providing the biggest area of opportunity for shippers to impact their parcel spend. As parcel carriers continue to raise rates and Amazon and COVID-19 disrupt the parcel landscape, this remains an area requiring increasing analysis and significant focus. Alexandretta becomes a trusted extension of our clients' teams, adding bandwidth and resources to optimize savings and time.

Audit Recovery & Business Intelligence

In addition to providing late shipment and manifest error recovery, we also provide sophisticated solutions that incorporate shipment booking, trend analysis, GL-coding, rate audit, shipment visibility, rate shopping, transit analysis, and business intelligence tools through our cloud-based systems.

Global Solutions

While we are headquartered in the US and have a powerhouse team of domestic parcel experts on staff, we also bring a passionate team of global experts that optimize parcel savings in Canada, Europe, the Middle East, and Asia. In addition to parcel spend management, we also drive significant savings on global air freight and US, Canada, and Europe-based trucking expenditures.

Global Savings

Alexandretta is the global leader in parcel spend management and brings a unique mix of integrity, expertise, commitment, resources, skillsets, and strategy to maximize your savings globally.
