

Audintel is the leader in multi-mode Freight Invoice Audit, and has developed the next generation of analytics platforms to provide actionable intelligence and visibility of your transportation supply chain.

The transportation analytics landscape continues to rapidly change. Maintaining your competitive advantage for a positive customer experience and cost containment through greater visibility and business intelligence requires a sophisticated, scalable technology platform.

Audintel has **disrupted** this space with the most robust Business Intelligence platform available today, maximizing value for our clients, as well as holding Carriers to the highest degree of accountability and compliance for their billing accuracy and performance.

Audintel's real-time analytics drive smarter business decisions while effectively supporting complex global networks across all modes of transportation, including: Small Parcel, LTL, FTL, Air Freight, Ocean Freight, Intermodal and Courier.

The Audintel technology platform is state-of-the-art, highly robust, agile, and stable; delivering a “best-of-breed” solution for your transportation analytics challenges.

Services overview:

- ▶ Perform a meticulous, comprehensive, multi-point weekly Audit of our client's Freight Carrier Invoices.
- ▶ Identify all invalid/inaccurate/unwarranted charges invoiced, along with identifying all Service Failures which are eligible for refunds, which we contest and file claims for on our client's behalf.
- ▶ Operate a professionally trained Call Center which calls claims into the Carriers, resulting in the greatest return per freight spend dollar in the industry.
- ▶ Providing Data Visibility to highly detailed and beneficial Transportation KPIs, as well as Carrier Performance monitoring.
- ▶ Providing a robust SaaS BI Portal, Ad Hoc Management Reporting, Online Invoice Visibility and Data Warehousing, running on an extremely responsive and highly secure SSL encrypted database.
- ▶ Providing Carrier Contract Analysis, Optimization, Negotiation services.

Audintel was founded by a team of technology veterans with a combined 75+ years of transportation, logistics and software development experience, and “aud”-“intel” is meant to convey that our value proposition is to provide not only the most thorough and comprehensive **audit** in the industry, but to also provide all the **intelligence**; analytics, KPIs, Carrier Performance monitoring our clients desire.
