

CDL has been a family-run business for 65 years and counting. What started out as a small local delivery service in Manhattan, has evolved into a full scale regional last mile logistics company.

We pride ourselves on being early adopters of new innovations and technologies that have significantly enhanced our service. New technologies such as VPOD (Visual Proof of Delivery), live GPS, SMS communications with drivers, and interactive opt-in notifications via email or SMS were specifically made to increase efficiency and make customers delivery experience as simple and convenient as possible.

Our Client Portal provides shippers from small businesses to large e-commerce retailers with detailed delivery information including VPOD, GPS, billing, invoicing, and captured documents.

Today, CDL has emerged as a northeast final mile package delivery powerhouse, serving 8 states, operating from 7 distribution centers, with more than 1,000 delivery personnel. Our 1-day footprint covers the northeast and mid-Atlantic corridor, with expansion plans into New England in 2021. We are rapidly expanding, delivering most e-commerce products, including meal kits, prescription medications, essential household products, retail and much more. Our customers love our simplified pricing structures and minimal accessorial fees, which include no residential or weekend surcharges. CDL is fully staffed and operational 7 days a week.

Consider CDL Last Mile today. As a family run business, we still care deeply about the quality CDL provides. We have capabilities far beyond most regional carriers and can help you grow your business by making your shipping and delivery operation seamless.
