

ICC Logistics was founded on the premise that few executives have the time and, in many cases, the expertise to identify and erase inefficiencies in their transportation and logistics processes.

For over 45 years, ICC has been saving clients thousands of dollars each and every month on their parcel and domestic shipping spend. ICC Audit processes keep your carriers honest and secure full refunds you are entitled to. We also develop pricing agreements that work for your company — not the other way around — without you having to lift a finger.

ICC's proprietary database and benchmarking tools contain millions of freight charge data elements and contract optimization highlights. These data elements cover virtually every shipping modality, carrier, and products shipped. Our seasoned auditor and analysts:

- ▶ Lower Parcel (UPS, FedEx) and Freight Shipping Expenses
- ▶ Help You Understand and Gain Control over Soaring Shipping Costs
- ▶ Provide Expert Insight into Your Shipping Characteristics
- ▶ Have All the Tools to Negotiate Improved Shipping Contracts
- ▶ Allow for Outsourcing Time-Consuming Audit and Billing Work to the Experts

ICC has helped hundreds of companies throughout the US gain control over significantly rising transportation and logistics costs. Are YOU ready to get more of your hard-earned money back in your bottom line?

**EXECUTIVE  
STATEMENT**

“Our passion is helping companies streamline processes, significantly reduce costs, and finally gain power over their logistics operations and spends. The result is lost profits back on our client’s bottom line and a happy management team who can finally focus on selling products and services, rather than stressing about logistics.”
