

LaserShip is the largest regional e-commerce carrier in the US and leader in last-mile delivery. Since 1986, LaserShip has continuously innovated to stay ahead of the evolving e-commerce marketplace by providing leading retailers and shippers shorter transit times, more flexibility, and lower costs than its competitors. Today, LaserShip has over 50 distribution centers and 4 sort centers reaching over 100 million consumers.

LaserShip's mantra, Personalize the Box, means LaserShip doesn't just deliver packages. Behind every delivery made is a story waiting to be fulfilled by the contents of a package. And this year, in the face of the COVID-19 pandemic, LaserShip has responded to the increasing reliance on e-commerce with upgrades and enhancements to meet consumer expectations. This year alone, LaserShip expanded its network to reach an additional 7 million consumers and rolled out major updates to its mobile delivery application, eLli 2.0™, to improve the efficiency and accuracy of deliveries. LaserShip also expanded its visual Proof of Delivery (vPOD) service, enabling consumers to better track their deliveries through photo confirmation, which is now available on LaserShip's tracking results page.

As more consumers turn to e-commerce, LaserShip will also add inbound lanes and expand automation to its 300,000+ sq. ft. sort center in South Brunswick, NJ, including an automated smalls/poly bag sort system. This enhancement will increase throughput by 20% up to an estimated 30,000 packages per hour.

Whether it's delivering meal kits to allow families to stay home during the pandemic or essential items, LaserShip is committed to setting the bar high by continuously improving the last-mile delivery experience in order to better serve its customers and respond to the changing needs to the e-commerce and delivery landscape.

EXECUTIVE STATEMENT

Josh Dinneen, Senior VP of Commercial Development

Our goal is to ensure every package is delivered on time and with care, and lately this has been more important than ever.

As e-commerce growth accelerates and online shopping becomes the new normal, more shippers are finding the value in diversifying their carrier mix with regional carriers.

Through our hub-and-spoke model, LaserShip is positioned to help shippers provide free, fast, and on-time deliveries consumers demand today.
