Integrated Shipping Management that Delivers!

Be ready for what's next with GlobalShip™, an enterprise-wide, multi-carrier shipping software that helps you meet your customers' delivery expectations at the lowest cost and can provide:

- ▶ Advanced carrier selection optimization using time in transit, DIM, and accessorials
- ▶ Containerization for optimal box sizing
- ▶ Address Validation
- ▶ Multi-Mode support for Parcel & LTL
- ▶ Windows or IBM i support
- ▶ On-Premise and Hosted deployment
- ▶ Improved Tracking and Proof of Delivery management

Top Tier Multi-Carrier Compliance

With GlobalShip™, you can manage all your carriers and shipping modes from a single, simple user interface. Multi-carrier flexibility lets you quickly adapt to an ever changing environment and gives you the tools to make the right choice on every shipment.

GlobalShip™ is a high-performance, shipping software that provides highly scalable, centralized shipping management for one or many locations.

API - Integration and Business Rules

Integrate GlobalShip™ with your ERP, WMS, and e-commerce applications with the GlobalShip™ API. The GlobalShip™ API enables easy and effective interfacing throughout the enterprise, as well as with related applications and hardware.

Implementing business rules with GlobalShip™ helps mistake proof your shipping workflow and reduces training time, improves accuracy and customer satisfaction while reducing your overall cost.

LTL

GlobalShip™ can also provide intelligent support for your LTL shipments. Advanced API connectivity to your carriers and your rates makes selecting the right carrier fast and seamless. Rated or Non-Rated; using GlobalShip™ can automate your LTL shipping and generation of the bill of lading and pallet labels.
