NPI has been designing leading-edge sorting equipment for over 40 years setting the standard for affordable, high quality, high speed, low maintenance machines, while meeting the highest expectations in automated mail sorting with the industry's most compact design.

NPI equipment currently operates in over 27 countries providing functionality specific to each country and each customer's operational requirements.

NPI's **Xstream** dual shoe-sorter has a modular, compact, ergonomic-design that makes sorting of parcels and flats faster and more efficient. It is capable of automated sortation of up to 24,000 parcels and flats per hour.

With an Xstream system, you will be able to sort poly-bags, boxes, flats, trays and tubs, and most irregular pieces as it can handle a wide variety of product sizes, shapes and weights; it is OCR and BCR capable, with optional in motion weighing, dimensioning, and labeling; offers several options for bin destinations such as carts, sacks, and gondolas and a versatile and user-friendly Windows-based user interface.

The Xstream integrates with your existing conveyor system and continues growing as your business grows!
