THE 2020-21

H O T

COMPANIES

OnTrac provides an affordable logistics network that speeds up ground delivery so companies can delight shoppers with world-class service and save money on shipping. The OnTrac service area can reach 65 million consumers and includes all of California and the major cities of the Western United States.

E-commerce companies choose OnTrac for their economy pricing and faster residential Ground delivery service. They offer the features and tracking tools you expect from big companies while still focusing on small-company customer service. OnTrac is a SmartWay Transport Partner, a USPS Workshare Partner, is SOC 2-certified, and integrates with over 30 leading multi-carrier software providers.

Adding the OnTrac logistics network to your cross-channel strategy gives your business a chance to reach more customers with overnight delivery. That means faster service, happy customers, and repeat orders. Plus, OnTrac has fewer fees and lower surcharges than the national companies, which means more profit to your bottom line.

- ▶ Surprise and delight customers with next-day delivery at Ground rates.
- ▶ Reach more shoppers each week with six-day delivery.
- ▶ Reduce costs with competitive rates, fewer fees, and lower surcharges.
- ▶ Increase productivity with late-night pickups and next-day service.
- ▶ Stay competitive with Sunday pickups for Monday delivery.
- ▶ Gain the advantage by offering same-day delivery with OnTrac Now service.
