WISETECH GLOBAL GROUP

Transtream Streamlines Multi-Carrier Shipping Across the Enterprise

Why do thousands of shippers, developers, and logistics service providers trust Pierbridge technology to process hundreds of millions of packages every year? Because we know shipping. It's no wonder Transtream has helped our technology partners achieve the highest FedEx, UPS, and USPS certification levels. We deliver.

What makes us different?

Experience: Pierbridge's executive team has led the parcel software industry for over 25 years, introducing innovation after innovation that has transformed the way businesses ship. We turn complex problems into simple solutions.

Global Reach: In times like these, it is more important than ever to rely on technology partners with staying power. Pierbridge is part of the WiseTech Global Group with over 2,000 employees helping customers across 150 countries streamline all modes of shipping.

Extensive Carrier Network: Transtream provides one platform to automate cartonization, routing, rate shopping, shipping, tracking, and returns for hundreds of parcel, LTL, and local carrier services worldwide.

Multi-Purpose: Our design studio (Composer) enables administrators to modify and adapt Transtream apps to role-specific requirements in warehouses, stores, suppliers, offices, and mail centers. Then change as business needs change.

Cartonization: Transtream algorithms instantly take the guesswork out of determining the most transportation cost-effective way to pack an order, load a pallet or a container. Save time, money, and eliminate unexpected dimensional weight (DIM) fees.

Mobile: Transtream's browser apps or API can be accessed by thousands of work stations, tablets, or phones across the enterprise and beyond. Integrate with scales, printers, and other data sources from the cloud using Transtream's IoT technology.

Enterprise-Class: Deployed on premise or in the cloud, Transtream's scalable, high-performance architecture enables you to ship hundreds of thousands of packages from a single location, or a few packages from thousands of locations per day.

Regulatory Compliance: Transtream provides the controls you need to ensure compliance with Dangerous Goods shipping.

Community Management: If you are a software developer or 3PL, Transtream multi-enterprise cloud architecture enables you to rapidly onboard, configure, and administrate thousands of customers, all from the cloud.
