The Business Landscape Has Changed. Send Smarter with Pitney Bowes.

For 100 years, Pitney Bowes has crafted innovative sending technologies that empower businesses to ensure they get it right every time they send, by simplifying the complexities of mailing and shipping. Sending is at the core of everything we do.

Shippers of all sizes can access industry-leading multi-carrier shipping via the SendPro® family of solutions, which brings together enterprise-caliber multi-carrier shipping, LTL/TL, postal capabilities and much more to take the guesswork out of selecting the right service level and carrier while delivering better control, visibility and accuracy over the entire shipping operation.

If your business has multiple data sources it becomes even more difficult to harness and control costs and other pertinent information across your organization, this exasperates the situation and creates an uphill challenge to effectively manage your operation. With rising shipping rates, growing volumes and an expanding market of viable carriers, it becomes harder to determine which carrier or mix of carriers offers the optimal combination of costs and service.

Through our connected digital eco-system of hardware and SaaS, we offer the latest analytics tools to help you manage your cost, understand your carrier mix and get more from your sending solutions. We provide the data and insights about everything you send, how much you've spent, how much you saved and identify new savings opportunities across your organization.

From the world's largest mailers and shippers to the smallest home offices, Pitney Bowes delivers innovative and scalable sending technology solutions to drive more value and help businesses grow.

Let Pitney Bowes help you simplify sending. pitneybowes.com
