

Realize maximum savings in every one of your parcel contracts. Let ShipSights show you how.

Optimized for your specific sector, ShipSights combines proprietary market intelligence and AI-driven analytics to discover avoidable expenses and compelling cost saving opportunities — immediately improving your profitability.

Technology – Our Approach

Sigma PSM, our cloud-based parcel spend management (PSM) platform, discretely conducts enterprise-grade supply chain analysis to deliver actionable insights into your parcel spend. Through intuitive reporting and sophisticated data integration, Sigma PSM simultaneously provides high-level analysis and package-specific insights.

ShipSights is unparalleled in this capability. Experience the difference.

Our Clients

Our clients significantly increase profitability by recovering unnecessary costs and gaining heightened visibility into their shipping data.

Explore whether ShipSights can make your parcel spend a profit center.

Your Advantage

Through deep spend analysis, proactive contract management, and significant fulfillment improvements, ShipSights offers next-level insights to make intelligent shipping decisions.

Strengthen market resilience through intelligent spend optimization and profit creation.

Uncover Additional Savings

Contact us today for a quick, no-cost, no-obligation parcel profit analysis.

Don't wait to reach the next level. Start saving now with ShipSights.
