

## Transportation Spend Intelligence Powered by Freight Audit

Trax is the global leader in parcel and non-parcel invoice audit. Combining industry leading cloud based applications with expert services across all modes, we are transforming traditional freight and parcel audit into Transportation Spend Management to help customers better SEE, SAVE, and CONTROL their global transportation costs and drive enterprise wide efficiency. With a global footprint spanning North America, Latin America, Asia, and Europe, we deliver data based visibility and insights, higher savings, and better control of transportation spend for shippers of all sizes.

### Transportation Spend Management

At Trax, our Total TSM<sup>sm</sup> solution is purpose-built as a closed loop spend management solution for transportation; combining and leveraging a best-in-class rate management, data processing, and audit capabilities with a rich set of spend intelligence solutions or Transportation Spend Intelligence (TSI). Total TSM represents the next generation of freight and parcel audit and we intend to drive the industry toward comprehensive transportation spend management to finally deliver the capabilities shippers require to better manage and control their transportation costs.

### Transportation Spend Intelligence

Best-in-class analytics can transform transportation cost data into any advantage for any shipper across any mode. Analytics can eliminate the pain involved with managing raw transportation data and converting it into actionable intelligence — reducing the time required to take action.

Trax delivers transportation spend intelligence through our TSI solution suite, enabling shippers to analyze their transportation spending and answer key questions like "Where can I save money?", "What should I be able to see that I can't?" and "How do I control my spend better?". Whether it's our TSI Insights solution, which captures all spending and KPIs in a best-in-class business intelligence solution or our patent pending TSI Variance Analysis, which quickly lets you measure the changes in your spending and identify the root causes of those changes, TSI gives you control.

### Why Trax

Trax delivers solutions that move beyond traditional freight and parcel audit and enable shippers of all sizes to quickly gain the benefit of transportation spend management — enabling you to better manage and control one of your most significant and complex spend categories.
