

At Visible, USPS also stands for Unprecedented Speed & Parcel Savings.

That’s because we are a USPS Approved Licensed Vendor, which enables us to satisfy each customer’s specific needs with optimized rates and services. Being one of only three companies authorized to resell USPS rates has made Visible an industry leader and authority in finding the perfect mix of price, speed, and accuracy to ensure a delightful customer experience.

In the online shopping world, customer experience is the new competitive advantage, so fulfilling shipping and delivery promises are of paramount importance. Thanks to Visible’s nationwide warehousing network and proprietary routing technology, not only can we provide two-day shipping to every US ZIP Code — but we have a proven 99.90% on-time delivery record. Due to the sheer volume of packages we process — close to 800 million every year — we have extraordinary buying power, but even greater value lies in the partnerships we build with our customers. Visible works with each client to analyze their specific needs and provide them with a customized solution that makes our resources work for their business. The result is selecting the best shipping option, every time.

And it doesn’t stop with shipping. Over the last three decades, Visible has become one of the country’s leading providers of packaging, fulfillment, warehousing, and freight services, up and down the supply chain. So, as consumer demand for online shopping and delivery options has aggressively increased, so has our ability to service it. And we fully recognize that our success is tied to the success of our customers. As they have grown, they have found that partnering with us and utilizing our ability to scale with them has turned their supply chain into a massive advantage over their competition. Visible has partnered with more than 25,000 customers, shipping almost anything, to anywhere on the planet.

We are offering companies of all sizes, in all industries, a comprehensive free analysis to help optimize shipping processes and costs. Contact our team to schedule your free analysis today.

EXECUTIVE STATEMENT

Why partner with an Approved USPS Reseller like Visible? Casey Adams, Visible’s President, has the answer: “The volume discounts, and a more thorough understanding of the speed and price consumer expectation mix, all result in a uniquely positive experience for USPS shippers. While there are two other companies who’ve achieved Approved USPS Reseller status, intuShip and Express One, no other company offers everything Visible does. Simply put, we were given this honored status largely because you just won’t find another partner that will handle parcels, shipping strategies, fulfillment, distribution, logistics, and custom packaging as seamlessly and efficiently as we do.”
