The NLG Logistics Group is an exclusive consortium of technology resellers and system integrators with over 150 years of combined experience in supply chain solutions. NLG solutions are engineered to be user friendly and are configurable to suit the individual business processes of each customer. From enterprise-wide solutions for Global companies to small business solutions, the NLG Logistics Group has the experience to implement a solution that will work in your business environment.

NLG multi-carrier software manages all carrier requirements, including online communication, compliance labeling, and carrier-approved manifesting. Economical features include unrivaled LTL automation, sophisticated rate shopping, and flexible data integration. The NLG Logistics Group has a complete library of interfaces to many of the leading ERP and business management software packages on the market today.

NLG serves our customers with an unmatched level of honesty, integrity, reliability and responsiveness; resulting in best-in-class solutions that positively impacts our customer's return on investment. Our customers recognize NLG as the partner they turn to for solving complex fulfillment and transportation problems.

Three different platforms are offered, including ProShip, ConnectShip, and Clippership. Each transportation platform is uniquely designed to assist a wide variety of clientele. Integration options include flexible, centralized enterprise solutions and cloud-based web services. Whatever your need may be, NLG has a system for you.
